In the CLAIMS:

The following is an examiner's statement of reasons for allowance: it is deemed novel and unobvious over the prior art of record to so perform a method for forming a substantially cylindrical window for an intracorporeal device comprising placing at least partially within a mold an assembly with a longitudinal axis, the assembly comprising a proximal tubular member, a distal member, a window preform comprising a material that may soften, and a mandrel disposed along the longitudinal axis and at least partially within the proximal tubular member, the window preform and the distal member, softening the window preform and applying force to urge together the tubular member and distal member to deform the window preform to form a window as claimed in claim 1; further comprising illumination the window preform to soften the window preform as claimed in claim 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
